GREEN LAB

GREEN LAB BIOME PANEL

#1000actionsfortheplanet

Wednesday 23rd October 2019, 2.00pm - 4.00pm

Piney Lakes Environmental Education Centre, Leach Highway, Murdoch.

Some Councils in the Perth metropolitan area have 60% hard surfaces, including carparks and roads. Millennium Kids interviewed over 500 young people across the Perth Metropolitan area and they are concerned about canopy loss, urban heat island effect, climate change and biodiversity loss.

Kids want a clean, green future. Help MKI, Department of Biodiversity, Conservation and Attractions and Council stakeholders construct new ways of thinking around protecting, monitoring and increasing canopy across the Perth metropolitan area.

Join Prof Lyn Beazley, AO FAA FTSE, Dr Danielle Brady, Stephen Breen, Dr Elaine Lewis and Griffin Longley, to explore how your school bushland is an opportunity for a best practise, interconnected series of Green Lab Biomes and have input on a big picture vision.

Tickets Free: <https://www.eventbrite.com/e/74066572111>
